## EDUCATION

2021 - 2025

THE OPEN UNIVERSITY OF SRI  
LANKA

- Bachelor of Software Engineering (hons) (R)

2020 - 2021

HARDY COLLEGE OF  
TECHNOLOGY - AMPARA

- National Diploma in ICT

2019 - 2020

VIVEKANANDA COLLEGE OF  
TECHNOLOGY

- Computer Network Technician (NVQ Level - 4)

## SKILLS

- React js | Laravel
- PHP | Java | C#
- HTML | Css | Js | Bootstrap
- MySQL | MS SQL
- ReactNative
- Git | GitHub | Gitlab
- Wordpress
- Jira

## PROFILE

I am a dedicated Software Engineer skilled in React.js, Laravel, and MySQL, with hands-on experience in developing responsive, user-focused web applications. I excel in both frontend and backend development and have strong expertise in API Architecture and the Repository-Service Pattern. With solid problem-solving and debugging abilities, I am passionate about technology and continuous learning. I strive to deliver clean, efficient, and scalable solutions that enhance user experience and drive business success.

## WORK EXPERIENCE

### Software Engineer

2023- PRESENT

Webtezza Pvt Ltd

- Built web applications using React for the user interface and Laravel for the backend.
- Created secure and scalable APIs with Laravel, following API Architecture best practices.
- Implemented the Repository-Service Pattern to keep the backend clean, modular, and maintainable.
- Developed reusable React components and managed application state with Redux.
- Used MySQL and SQL queries to manage and optimize database interactions.
- Worked in Agile teams, participating in sprint planning, stand-ups, and review meetings.

### Software Developer

2023 - 2024

ATS Lanka (Pvt) Ltd

- Collaborated with a team of software engineers to debug and resolve coding issues.
- Assisted in the design and implementation of a user-friendly web-application for data visualization.
- Conducted rigorous testing and quality assurance on software products to ensure optimal performance.

### Intern Software Engineer

2022 - 2023

TEQ2O (Pvt) Ltd

- Assisted in developing backend features for Online Movie Ticket Booking.
- Collaborated with senior engineers to debug and troubleshoot code issues.
- Participated in code reviews and provided feedback to enhance code quality.

### WORD PRESS DEVELOPMENT PROGRAMME

- ICT Clouds

## EXPERTISE

---

- Time Management
- Communication
- Problem Solving
- Creativity
- Leadership

## PROJECTS

---

### Nippon Kuruma

- Nippon Kuruma is a dynamic platform revolutionizing the way vehicles, equipment, and auto parts are sold and exported in Japan. I developed this project — handling both frontend and backend — to bring the platform’s vision to life. Built using Laravel (PHP) for the backend, MySQL for the database, and React.js with Redux Toolkit and Bootstrap for the frontend, the platform is designed for a wide range of users including dealers, sellers, buyers, agents, and corporate clients. This ongoing project delivers a seamless and intuitive online experience for real-time auctions, fixed-price sales, and international exports — all from one centralized platform.
- Link : <https://nipponkuruma.com/>

### Grocery Store Web App React and Spring Boot (Full stack Application)

- Developed and published a Grocery Store Website on Azure.com using React and Spring Boot, enabling users to browse, shop, and manage orders efficiently.
- Website: <https://flavor-frenzy-f2e58.web.app/>

### Pharmacy Management System - Laravel.

- This application is for medical prescriptions. Users can register, log in, and upload prescriptions. Pharmacy admins can view these prescriptions, prepare quotations, and send them to users. Users can then accept or reject the quotations, and the system notifies the pharmacy accordingly.
- project on GitHub : <https://github.com/AM-ASKY-97/Laravel-Pharmacy-Management-System>

### User Management System - React and .NET Core

- Developed a web app using .NET Core, ReactJs, and MySQL/SQL for user registration, login, and role-based management. Administrators have full control, Staff can add/edit information, and Users can only manage their own data. The app features secure authentication, role-based access control, and a user-friendly interface with data in JSON format.
- project on GitHub : <https://github.com/AM-ASKY-97/user-management-system-react-and-asp.net>
